WATER - A SHARED RESPONSIBILITY

United Nations/WWAP

Foreword by Kofi Annan

Prologue by Koïchiro Matsuura

Preface by Gordon Young

Quantity

A joint undertaking of the 24 UN agencies comprising UN-Water, and in partnership with governments and other entities concerned with freshwater issues, this volume, covering as it does all regions and most countries of the world, provides an up-to-date global overview of the state and uses of freshwater, critical water-related problems, and societies' coping mechanisms. Drawing on an extensive database, expert analysis, case studies, and hundreds of graphic elements, it is the most comprehensive undertaking to date of freshwater assessment, providing a mechanism for monitoring changes in the resource and its management and progress towards achieving development targets, particularly the Millennium Development Goals.

Building on the conclusions of the first United Nations World Water Development Report, *Water for People, Water for Life* (2003), the 2006 Report confirms the ongoing, serious and growing water crisis—essentially a crisis of governance—and points to a prevalent lack of capacity and knowledge base as today's primary obstacles to achieving the necessary levels of water governance. This volume proposes a more integrated vision of water resources management to respond to changing environmental and socio-economic conditions.

2006, 600 pages, 300 ils, bibliog., index

WATER FOR PEOPLE - WATER FOR LIFE

Published in association with the United Nations

With a foreword by Kofi A. Annan, Secretary-General of the United Nations

"... shows the United Nations at work, helping the world to confront current and impending water crises. I recommend this publication to the widest possible audience." · Kofi Annan

"The book is well illustrated and contains abundant data tables ... In general, the writing quality between the chapters is even and of high quality ... Highly recommended." · Choice

Quantity

Based on the collective inputs of 23 United Nations agencies and convention secretariats, this Report offers a global overview of the state of the world's freshwater resources. It is part of an on-going assessment process to develop policies and help with their implementation as well as to measure any progress towards achieving sustainable use of water resources.

With its comprehensive maps, glossary, references and coverage of a broad range of themes and examples of real-world river basins, the UN World Water Development Report will no doubt prove to be a most valuable reference work.

2003, 688 pages, 25 maps, figs, tables

ISBN 978-1-57181-628-3 Pb ~~\$49.95/£35.00~~ **\$39.96 / 28.00**

CONVERSATIONS ON THE BEACH
Fishermen's Knowledge, Metaphor and Environmental Change in South India
Gotz Hoeppe

Based on ethnographic fieldwork among Hindus and Muslims in a coastal village, this book explores the fisherfolk's environmental knowledge, its transformation in a period of rapid socio-economic and political change as well as its role in dealing with the state and the science - putatively universal and objective - upon which the state's policies are claimed to be based. The book emphasises conversation as a cultural process, metaphors and figurative speech in the investigation of knowledge, as well as the use and limits of memory in conceptualising environmental change
